**Requirements**

Masts and systems can be built and customised along to customer operational requirements and situations.

All our mast solutions are designed and manufactured to meet highest stability and rigidity from mechanical, hydraulic, pneumatic and manual deployment systems.

Fully integrated solution can be offered with Cameras, Radars, Data Links and software for command and control stations which can be fixed or in a mobility vehicle or on a trailer with the mast of any kind.

Long term product support and training are already well proven in many installations worldwide. All this is tailored with customers to reach the set requirements from the beginning to the end.

Any thermal or visible cameras in size and performance as needed for a successful mission, including all kind of associated equipment like monitors, recorders, data link, moving map, Laser Range Finder and GPS etc.
