

Blasting booths and recovery abrasive grit

Blasting booths

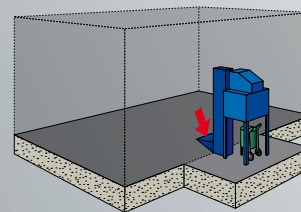

Designed to your specific needs

Eurotherm blasting booths provide a safe and clean environment for blasting operations. Our blast booths are custom engineered, designed and built to meet your unique requirements.

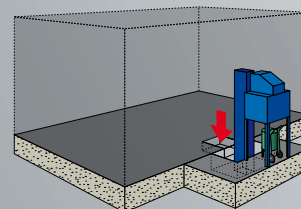

We design and engineer solutions that satisfies every detail of your needs. From economical simple dust recovery units to highly efficient full floor reclaim systems, your exact blast booth and economic demands will be achieved.

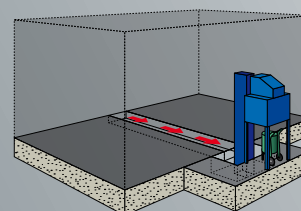

Type of grit recovery

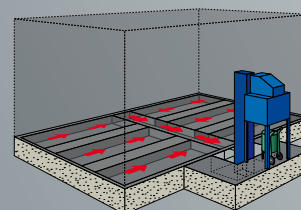

(1) Manual recovery
(without foundation)

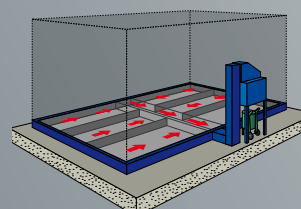

(2A) Semiautomatic
recovery with loading
hopper (partial
foundation)

(2B) Semiautomatic
recovery with
transversal screw
conveyor (partial
foundation)

(3A) Automatic recovery
(with complete
foundation)

(3B) Automatic recovery
over the floor (without
foundation, with raised
work floor)

Recovery abrasive grit

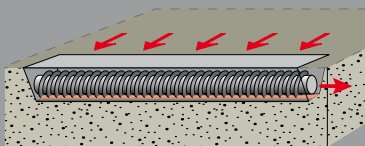

Engineered to your specifications

Our worldwide experience with abrasive blast systems makes us the leader for blast booths and recovery of the grit dust.

“We are your provider for high quality abrasive blast systems and components”

How our system works

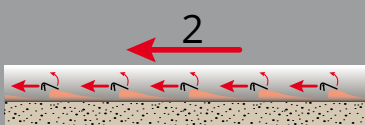

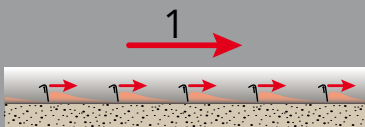

Semi-Automatic Recovery System

This system utilize a screw to return the abrasive material to the foot of the grit recovery system.

Full-Area Recovery System

This system utilize scrapers that conduct the abrasive material to the foot of the grit recovery system.

Operation principle
grit recovery system
